

ALL CAUSE MORTALITY DATA – CANADA

Stats Canada Data as of May 9th, 2024

All provinces are still lagging in reporting for 2023 and many are still adding data to 2022. The final all cause death numbers for all provinces is expected be above the high of 2022 as a result. January 8th, 2024 to May 9th, 2024 reports saw an increase in Canadian reported deaths of;

- +17,085 in 2022
- +106,045 in 2023

Only Alberta, BC, Northwest Territories and Quebec have reported up to Week 9 for 2024 (Newfoundland & Labrador reported to week 8), but even these numbers are not yet confirmed and will likely rise in the coming months.

Alberta is showing a disturbing increase in deaths in the under 45 age groups for 2023. These are not deaths being driven by immigration or the “baby boomers”. Alberta is a stark example of this younger age groups dying at an accelerated rate.

Nova Scotia deleted 25 weeks of data from 2023 in April. This removed over 4,900 deaths from the data. Now they are reporting to Week 38 with noticeable lagging in weekly reporting.

2024 provincial data is showing this will only get worse from here.

WHERE DID ALL THE DATA GO FOR NOVA SCOTIA?

In April they have All Cause Data to Week 5 of 2023. In March they had published data to Week 30 of 2023. Between March and April publications, Nova Scotia deleted 4,910 All Cause deaths and 25 weeks of data. Note this data is also removed from the Canada total, skewing the overall data.

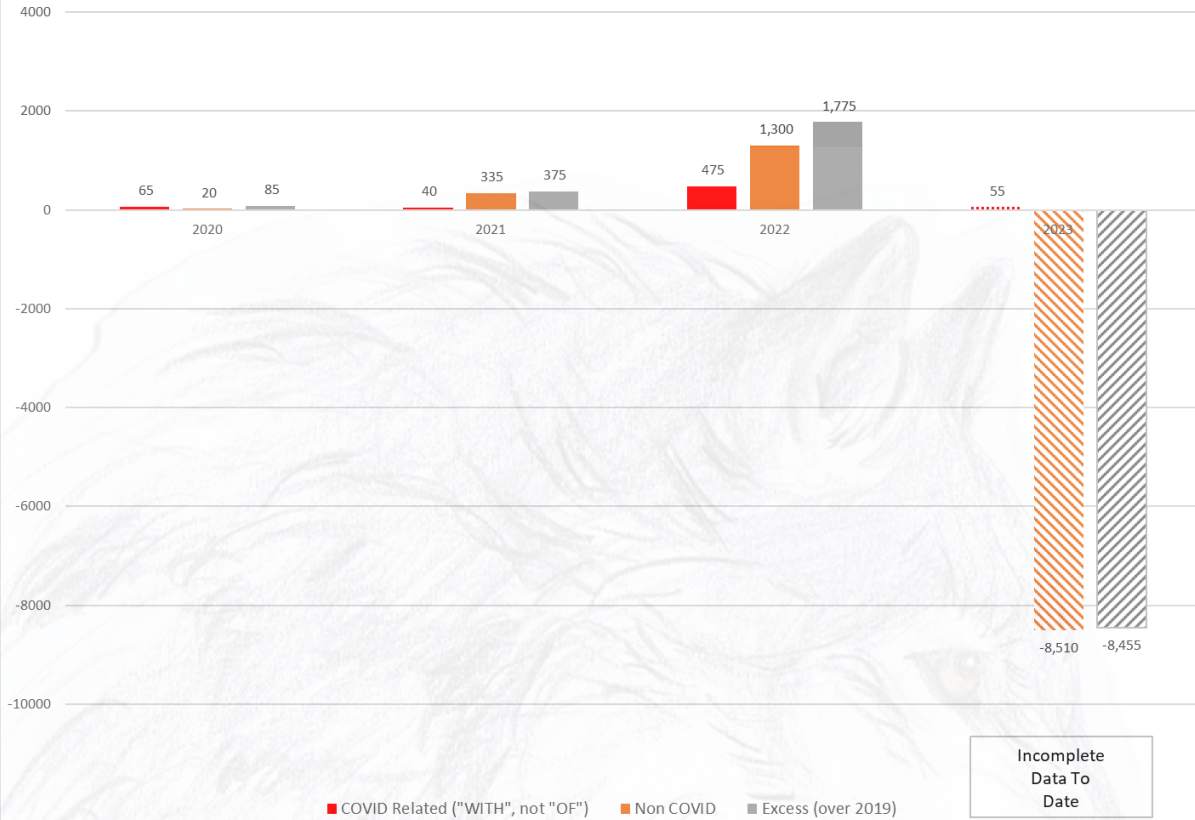

Data up to 1pm ET April 18th, 2024
