

# **ALL-CAUSE MORTALITY DATA – CANADA**

## **Stats Canada Data as of October 10<sup>th</sup>, 2024**

*All provinces are still lagging in reporting for 2023/24 and many are still modifying data for 2021/22. The final All-Cause death numbers for all provinces are expected to be above the high of 2022. Data from Jan 8<sup>th</sup> 2024 to Oct 10<sup>th</sup> 2024 saw an increase in Canadian reported All-Cause deaths of;*

- -30 in 2021
- +16,940 in 2022
- +113,815 in 2023

*There is also a discrepancy between Federal & Provincial totals for 2022/2023 of 20,245 in the same data set.*

*Only Alberta, BC, Quebec & NWT have reported up to Week 31 for 2024. However, even these numbers are not yet confirmed and will rise in the coming months.*

*Most provinces, & Canada overall, show a disturbing increase in deaths, especially in the younger population. In 2024, deaths in older age groups are increasing due to ongoing Care Home Lockdowns. These are not deaths being driven by immigration or the “baby boomers”.*

*Manitoba published data for 2024 in September although it is still modifying data going back to 2021.*

***ALL 2024 provincial data shows this will only get worse from here.***

***2024 WILL be the worst on record for All-Cause deaths in Canada and we still have not seen any reset for premature excess deaths since 2020 that total 291,046 (6,731 more than all 2019 deaths).***

***Whatever is causing these excess deaths is still happening (and it isn't COVID).***
