

Alberta CMOH official policy on the use of pre-filled syringes for COVID Vaccines in 2021

“immunizers must:”

“Only administer the COVID-19 vaccine that they have drawn up and labelled themselves”

Prefilled syringes during the COVID shot rollout were prepared improperly and in many cases by untrained staff. This was reported to UNA, Colleges, and AHS. This was against College requirements and CMOH directions during 2021. Any and all COVID vaccinations given during that time using a pre-filled syringe by AHS or Pharmacies would be considered **without** informed consent. This makes every single shot given within those criteria a reportable assault.

The Union (UNA), Colleges and AHS buried this information in 2021/2022. This was later reported to Freedom Lawyers in Alberta who again buried this information along with AHS and a nursing college in 2021/2022.

In 2023 this was brought to the attention of the Chief of Staff of the Alberta Justice Minister. He buried this information. The UCP Chief Whip, Justice Minister, Health Minister, Public Safety Minister among others are all aware of this practice and have buried this information as part of a conspiracy to commit an obstruction of Justice. All MLA's in Alberta are aware of this (on both sides of the aisle). None have done anything.

In 2024 EPS was directly informed of this and the Head of internal Legal services at EPS specifically refused to have EPS investigate this mass assault on the population of Alberta despite having direct evidence of it.

It is now urgent that anyone who was part of the zoom call with UNA (or filed a complaint with a college, AHS or their union), used a prefilled syringe and/or has any information on the direction given to use prefilled syringes that they did not draw themselves contact me immediately.

“Requirements

In addition to the Alberta Immunization Regulation, regulatory and employer requirements, **immunizers must:**

- Label the prefilled COVID-19 vaccine syringe with the vaccine type, vaccine lot number, and date and time the vial was first punctured and/or reconstituted, and
- **Only administer the COVID-19 vaccine that they have drawn up and labelled themselves.**

CARNA, CLPNA and CRPNA have been informed of this interim policy. It is the regulatory colleges' expectation that all regulated members must follow public health advice and guidance set out by the Chief Medical Officer of Health (CMOH), under the Public Health Act during this declared state of public health emergency. Regulated members are encouraged to contact their regulatory body with any Standard of Practice related questions.”

<https://www.ab.bluecross.ca/pdfs/Off-Site-Pharmacy-Immunization-Policy-APPROVED.pdf>

"In addition to the Alberta Immunization Regulation, regulatory and employer requirements, immunizers must:

- Label the prefilled COVID-19 vaccine syringe with the vaccine type, vaccine lot number, and date and time the vial was first punctured and/or reconstituted, and
- **Only administer the COVID-19 vaccine that they have drawn up and labelled themselves.**

Individuals who are to receive COVID-19 vaccine from a PFS must provide informed consent."

"Suggested informed consent script:

“Due to challenging vaccine storage and handling requirements, the best way to transport the vaccine to your home is in a prepared syringe. It is important to understand that transporting the vaccine this way has not been broadly studied and there is limited data regarding the stability of the vaccine transported in this way. Would you like to proceed with receiving an immunization from a prepared syringe for COVID 19 vaccine?”
