

Half-truths are worse than lies. If we do not have the whole truth - how can anyone be trusted?

I have to ask why, a high-profile individual would misrepresent the below facts in continuing speeches that help no one?

How do these half-truths end the shots or restrictions in care homes and hospitals? How do they bring Justice for Jerry Dunham and Sheila Annette Lewis' family, along with tens of thousands of others in Alberta?

There is so much credible evidence that could be used to end the insanity that continues at this government's direction, as he is well aware.

As a retired Police Officer who investigated these types of crimes, I have zero tolerance for the perpetrators. Anyone defending the actions of such people should be called out.

However, that does not excuse misinformation that appears designed to distract from government actions that continue to destroy the lives of so many Albertans.

If this individual truly wished to protect children in Alberta, why is he not addressing the provable crimes instead of working with the very people who are actively obstructing justice?

The CPSA has a history of protecting doctors before 2020. However, since 2020 they have gone after healthcare professionals improperly for COVID-related items, as have all the Colleges. I have helped many healthcare professionals in this area since 2020, including the application to stop both the COVID shot mandates and the push to inject 5-11-year-olds in 2021.

Ask all the current 'saviours', what they were doing then.

[I know what I was doing.](#)

As regards the four doctors' stories (two of whom are rightly serving sentences). I have to question the true intent behind them being used as a distraction to focus everyone away from the government and toward AHS alone. AHS that is currently being turned into the largest private health care organisation controlling most hospitals, health care workers, care homes and labs in Alberta, All while distancing them from the government to hide the crimes of the past.

There is no excuse for the actions of anyone abusing children or any vulnerable person. But not providing the full picture is not helpful to find justice.

Albert de Villiers

Charged May 28th, 2021

This was a police, not a College matter.

<https://rdnewsnow.com/2021/06/09/former-ahs-north-zone-top-doctor-charged-with-sex-offences-released-on-conditions/>

June 2023 - sentenced to 5 years

The College can only add items related to investigations/hearings.

The College has a hearing scheduled for June 2024 after a delay possibly related to the sentencing.

Fred Janke

Reported in 2018 (not during the pandemic).

Charges stayed by Alberta Justice in 2020.

NOTE: ALBERTA JUSTICE STAYED THE CHARGES - NOT THE COLLEGE.

Editor's note: On Dec. 4, 2020, a spokesperson with Alberta Justice and Solicitor General confirmed the charges against Janke were stayed. The spokesperson said "the Alberta Crown Prosecution Service makes decisions independent of government and independently determined that there was no longer a reasonable likelihood of conviction and stayed the charges."

Ghassan Al-Naami

August 2019

Ghassan Al-Naami withdrew from Practice (before the pandemic) as part of an agreement with the College pending the outcome of criminal charges.

https://cpsa.ca/wp-content/uploads/2020/04/Final_D.-Al-Naami-Withdrawal.pdf

September 2021

Ghassan and his lawyer fought the College in court (not the other way around). The College didn't protect him.

His lawyers did!

<https://canlii.ca/t/jh0tv>

"Counsel for the College submitted that were anonymization contemplated an application should have been made on notice to the media."

"Following discussions with the Director, Dr. Al-Naami provided an undertaking to withdraw from practice and the College stayed its investigation pending resolution of the criminal charges."

Dr. Al-Naami subsequently sought to return to practice under conditions. The Director required Dr. Al-Naami's consent to communicate with the Crown prosecutor respecting Crown disclosure for the charges. Dr. Al-Naami has not provided that consent. The Director has not authorized Dr. Al-Naami to return to practice on conditions."

"I order the College to reconsider whether, on the information currently available to the College, Dr. Al-Naami could be permitted to return to practice on conditions that would appropriately protect young patients. I am not directing that Dr. Al-Naami be permitted to return to practice. Rather, I am directing that the College consider whether there are any conditions that could be imposed on Dr. Al-Naami's return to practice that would reasonably protect young patients from becoming victims of criminal offences. If the College considers that such conditions are available, I direct the College to consider whether Dr. Al-Naami's Undertaking may be suitably amended to permit his return to practice. I direct the College to provide an explanation to Dr. Al-Naami as to why his Undertaking may or may not be amended to permit his return to practice on conditions."

As a result of the actions of Ghassan's lawyers and his refusal to provide the required documentation, the College had to reinstate him. However, they did add restrictions to his practice at the time. Without a conviction or formal hearing, the College has limited powers.

June 2022

<https://canlii.ca/t/jpxw4>

That did not stop the College from subsequently seeking (and obtaining) a court order to force Dr. Ghassan Al-Naami, to provide the documentation so they could complete their investigation and take appropriate action.

"[2] The Respondent, Dr. Ghassan Al-Naami, is a pediatrician and member of the College. Dr. Al-Naami is facing an unprofessional conduct complaint by the College relating to criminal charges against him for the possession and transmission of child pornography. The criminal proceedings are ongoing.

*[3] In the present application, **the College seeks an Order directing Dr. Al-Naami to provide a copy of the Crown disclosure in the criminal proceedings to the College for its use in the disciplinary proceedings.**"*

August 2023

Guilty

<https://www.cbc.ca/news/canada/edmonton/edmonton-pediatrician-found-guilty-on-child-pornography-charges-1.6950061>

October 2023

Lawyers and doctor still refuse to co-operate despite a court order.

The College continued to try to obtain documents from Ghassan Al-Naami (as ordered by the courts). This was another application by Ghassan Al-Naami's lawyer (that failed)

This appears to have been dealt with by the Courts.

The College lists him as Active but not currently in practice.
