

Dear Madame Premier et al,

As a follow up to my communications on June 13<sup>th</sup>, June 14<sup>th</sup> and June 15<sup>th</sup>, 2023 (with links to previous correspondence as yet unanswered).

<https://dksdata.com/Court/ToAlbertaPoliticians2023-06-13.pdf>

I have questions. Why don't you?

Lies upon provable lies.

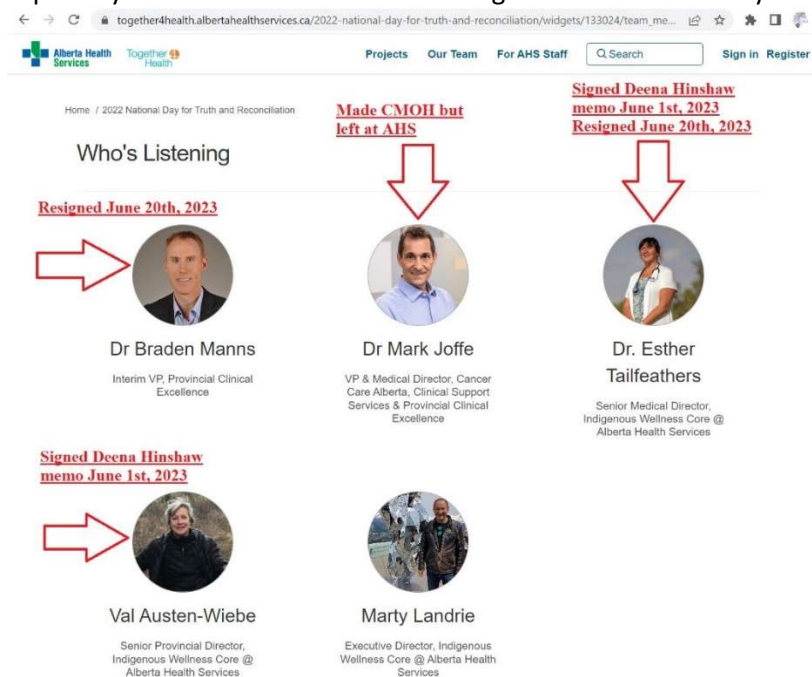

**Dr. Deena Hinshaw**

The Deena Memo has more evidence of the truth – so why are you all ignoring it?

[https://dksdata.com/DS/IWC\\_Memo\\_Announcement\\_DH\\_June1.2023%20Final.pdf](https://dksdata.com/DS/IWC_Memo_Announcement_DH_June1.2023%20Final.pdf)

Especially with the turn of events on Indigenous Awareness Day.

**Excess Deaths**

Updated UK (England/Wales)

Excess Deaths Week 23, 2023.

AVERAGE WEEKLY DEATHS IN 2023 ARE THE HIGHEST ON RECORD

14,163 in 2019

36,987 to date in 2023

PROJECTED EXCESS DEATHS for 2023 - up to 117,573 as of June 20th, 2023:

<http://dksdata.com/COVID19>

<https://twitter.com/dksdata/status/1671236245706645505?s=20>

<https://dksdata.com/COVID19>

England & Wales - population 59 million: Excess Deaths 2022 - 63,825

Canada - population 40 million : Excess Deaths 2022 - 75,747+

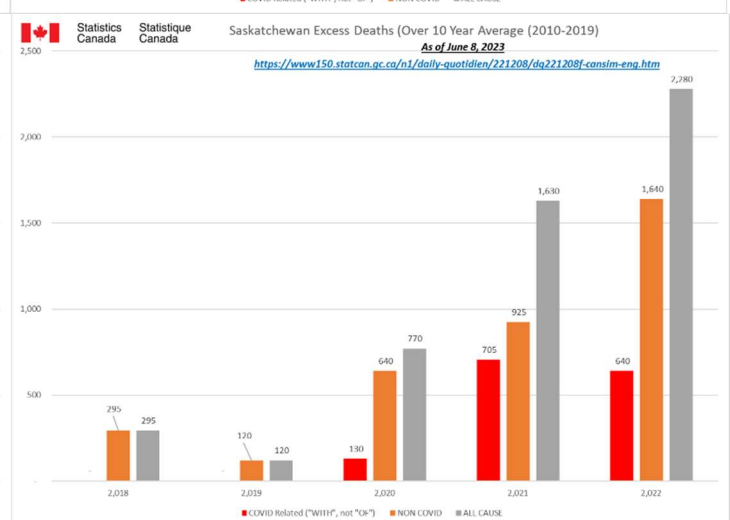

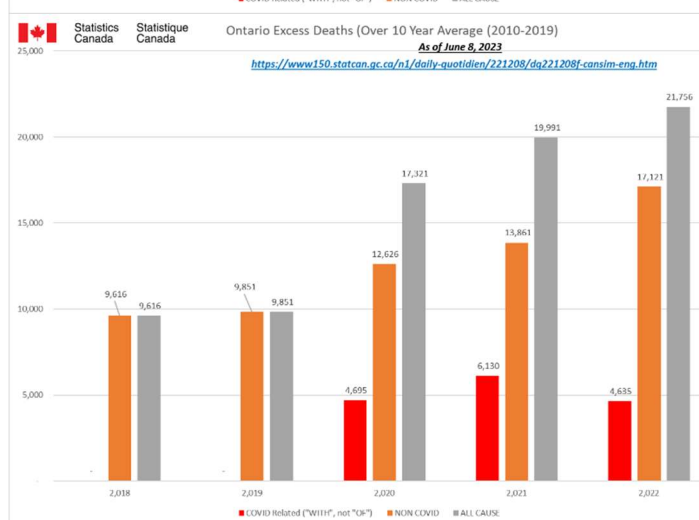

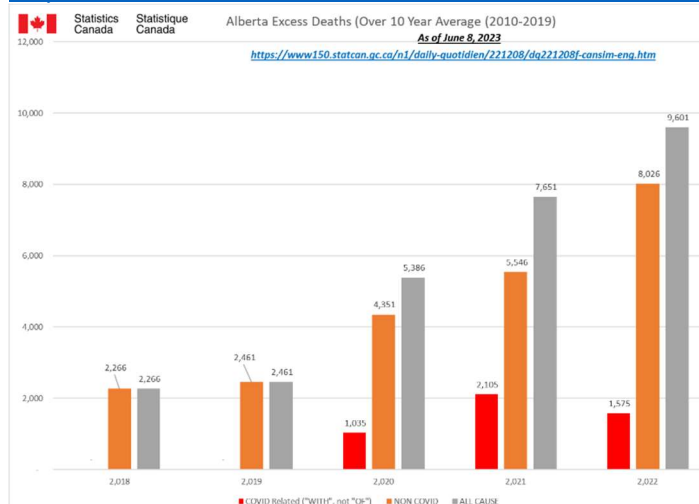

Canada's excess deaths are 50% higher per capita than England & Wales in 2022

<https://twitter.com/dksdata/status/1671305238534582272?s=20>

Excess Deaths are off the charts everywhere. Alberta excess deaths are double those of the UK for 2022. Saskatchewan the same and BC even worse.

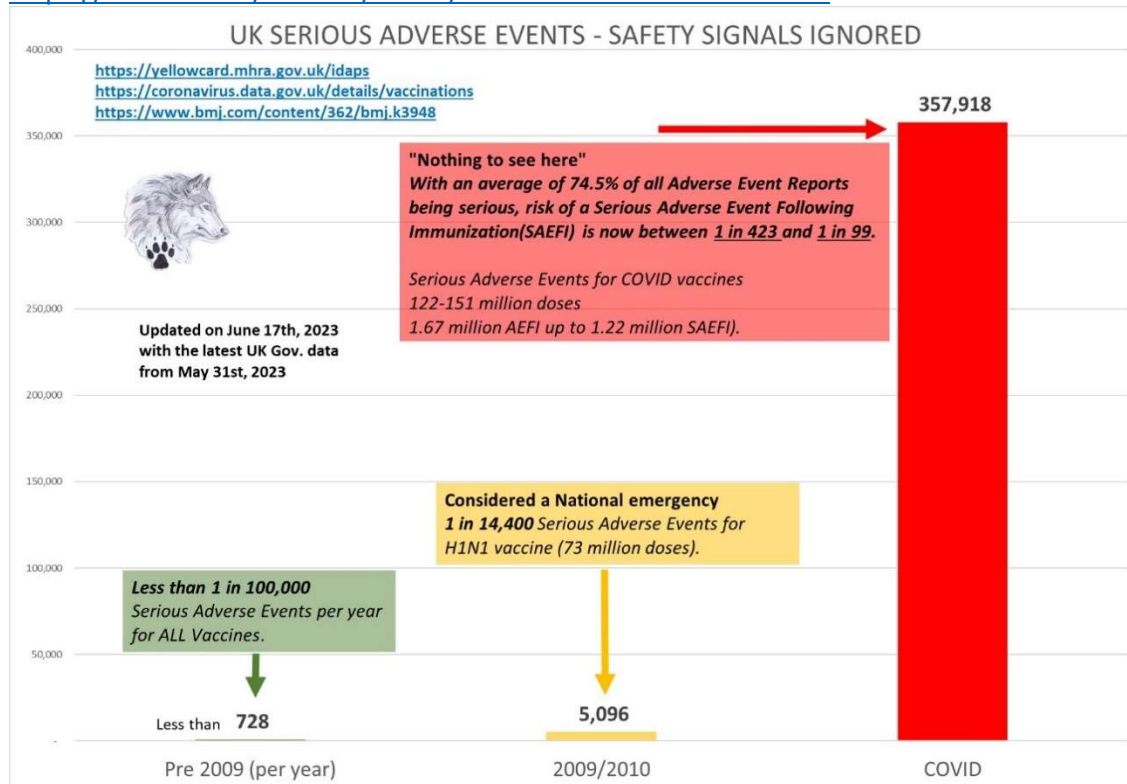

<https://twitter.com/dksdata/status/1671317721584398336?s=20>

## Safety Signals.

Serious Adverse Events Following Immunization as high as 1 in 99. If you get an adverse event, it is almost certain to be serious in the UK (1 in 1.1)

The largest single increase in Janssen vaccinations in Alberta last week (4,335 doses).

<https://twitter.com/dksdata/status/1670159457412853760?s=20>

Then flatlined this week. It is clear from this that reporting of the vaccinations given in Alberta were being suppressed for the election. The data was there and there were updates. Those 4,335 doses were clearly from a period much longer than the three weeks the system was down.

Would this be connected to Premier Smith recommending this vaccine to desperate healthcare workers in 2021?

What about the known dangers, then and now?

Danielle Smith April 2021. "There will be a reckoning" re pushing COVID vaccines.

Totally agree. I'm convinced I had it last March when it was impossible to get a test. There will be a reckoning after this. No wonder the pharma companies were shielded from liability.

Danielle Smith October 2021. Vaccinated in the U.S. Has a \$100K Go Fund Me for the J&J (same as the AstraZeneca vaccine but a double strength dose). How many people followed her 'advice' and got vaccinated for a job? How many were injured?

I've fielded several emails from people asking how to get the J&J jab. So if you want to add your name to the chorus of people asking for a delay, I will post my letter when we send it and I invite you to ask for the same.

But I don't have much faith the government will delay the enforcement of their draconian health orders, so for those who want to try to get the J&J before the October 25 compliance date, I'll reprint the best advice here, because it is the simplest way to get the shot in the meantime. But for heaven's sakes. It shouldn't be this hard or this costly.

I went to Phoenix, but I would have gone to San Francisco if I'd known this option was available. You have to get tested on the way out and the way in. If you do a quick turnaround you can get away with just one PCR test. If you can do some business while you are down there you can qualify for an exemption. If you don't qualify, your choices are to stay down there for 2 weeks until your jab is "valid" or come back and quarantine for 14 days.

**"THERE WILL BE A RECKONING AFTER THIS"**

**WILL THERE BE A RECKONING FOR EVERYONE  
PUSHING THESE VACCINES, DANIELLE?**

**Johnson and Johnson - Second highest rate of Adverse Events Following Immunization in Alberta per 100K**

<https://www.alberta.ca/stats/covid-19-alberta-statistics.htm#vaccinations>

Table 4. Number of adverse events following immunization (AEFI) by vaccine name reported in Alberta

Vaccine name	AEFIs (n)	Rate (per 100,000 doses)	Doses
AstraZeneca	219	69.7	314,032
Janssen	7	82.9	8,448
Moderna	727	36.9	1,970,470
Novavax	4	149.7	2,672
Pfizer/BioNTech	1,830	25.9	7,056,027
All	2,787	29.7	9,396,964

**November 13, 2021** by Danielle Smith, Organizer

Well folks - it looks like we finally got some vaccine choice. 5000 doses of J&J have arrived in Alberta with 15000 to follow, and more if there is demand.

Remember there is an elevated risk of blood clots for women under age 50, so when I took it my doc recommended 30 days of aspirin and co-enzyme Q-10 to mitigate against potential side effects. Please consult your doctor for advice.

You can make a J&J appointment by calling 811 in Alberta.  
Let me know if you have success.

And we now also have monoclonal antibody treatment if you get hospitalized to help with recovery. This is the treatment Gov Ron DeSantis has been promoting for months.

The last missing piece is an early outpatient treatment protocol. Don't worry I'm still working on that. We have a two track option: we are pursuing a legal challenge against the College of Physicians and Surgeons and we are attempting to get a clinical trial so doctors can enroll and prescribe legally during the fall respiratory virus season.

Sorry things move so slowly but we are making progress.

## HOW MANY HCP's TOOK HER ADVICE?

### WHAT CHANGED FROM APRIL 2021, DANIELLE?

On Apr 26, 2021, at 7:08 PM, David Dickson <david.dickson@dksdata.com> wrote:

Thanks (just a tiny piece of what I have been gathering for over a year now).

When people say the 2021 numbers include other vaccines... this shuts them up. This is the data just for COVID vaccines which covers a little bit of the end of 2020.

**October 10, 2021** by Danielle Smith, Organizer

I went to Phoenix, but I would have gone to San Francisco if I'd known this option was available. You have to get tested on the way out and the way in. If you do a quick turnaround you can get away with just one PCR test. If you can do some business while you are down there you can qualify for an exemption. If you don't qualify, your choices are to stay down there for 2 weeks until your jab is "valid" or come back and quarantine for 14 days.

Here we go. This is what my listener did:

I did 72-hours ON-SITE TESTING\*\* Rapid PCR Test \$195 Covid test at the Accurate Covid-19 Testing - PCR Test - Numi Health. The test was taken at 9:00 a.m. The result came by e-mail same day before 5:00 p.m. This test is accepted by US and Canada. (\*My note - the \$40 Rapid Test from Shoppers Drug Mart will work to get into the US, but you need the more expensive PCR test to get back. My listener wanted to do a fast turnaround so she got the PCR that allowed her to do a quick turnaround with a single test.)

On the next day, I flew to San Francisco, took care of the personal business, and stayed in the hotel overnight.

On the next day before I checked-in to my flight back to Canada, I stopped by the clinic at the airport in International Terminal Level 3 Departure Hall.

I was warning about this in 2021 (and before). AHS knew about these concerns as did Premier Smith. The reality of what AHS knew and did is criminal. Strangely, Sheila Annette Lewis' lawyers actually have evidence of crimes being committed back in 2021. Instead of using it to help save Sheila and others, they actively buried it. I now have that evidence.

Sheila Annette Lewis has been sentenced to death by the Supreme Court of Canada. She is not the only one.

The truth about her story is far more disturbing than that though. She could have been saved as could so many others.

Alberta Health Services exists at the legal behest of the Alberta Health Minister. The Alberta Health Minister exists at the behest of the Premier. The Alberta Transplant Society does not require a COVID vaccine for transplants.

The NACI advice, Alberta COVID Vaccine Consent forms, manufacturers' data and the direction initially given to healthcare professionals providing these shots states **'THERE IS NO SAFETY OR EFFICACY DATA FOR TRANSPLANT PATIENTS SO THE VACCINE MUST NOT BE GIVEN TO TRANSPLANT PATIENTS'**. That direction existed in 2021. It still stands today.

Sheila Lewis' case was never a constitutional argument. Most COVID-related cases never were.

It was a matter of fact, of a known lack of safety and efficacy data and Alberta law. The Health Minister(s) could have stopped this at any time and saved her.

Why didn't Tyler Shanro or Jason Copping?  
Why didn't Danielle Smith or Jason Kenney?

And why the costly legal games designed to fail?

I warned about this in November 2021.

Questions need to be asked, and not just of the courts.

Judges, Doctors, Lawyers, Health Ministers, Premiers.  
All have blood on their hands.  
And not just from this case.

3:09 PM · Jun 8, 2023 · 418K Views

Sheila needs 3-4 COVID jabs for a transplant. 1 in the last 6 months, or \$600K USD to go to the US.  
4.2 Million Albertans don't know they are 'undervaccinated' and would be in the same boat.  
Can you 'afford' to stay silent?

June 19th, 2023

<https://www.alberta.ca/stats/covid-19-alberta-statistics.htm#vaccinations>

Alberta	Alberta Population	No Dose	1 Dose	2 Doses	3 doses	4 doses
<b>At least (doses)</b>	4,416,692	779,674	3,637,018	3,448,042	1,830,278	1,147,633
<b>Last 6 months</b>	4,416,692	779,674	- 6,395	- 3,108	27,136	218,163
<b>Currently Ineligible for Transplant</b>	<b>4,180,896</b>	<b>779,674</b>	<b>195,371</b>	<b>1,620,872</b>	<b>655,509</b>	<b>929,470</b>

<https://www.albertahealthservices.ca/frm-21765.pdf>

"For some people, **2 doses may not give enough protection**. You may need **a third dose to complete your primary series** if you have a health problem that weakens your immune system. For example:  
You have had or will have **an organ or stem cell transplant**."

<https://www.alberta.ca/assets/documents/health-cmoh-covid-19-immunization-physicians-pharmacists-booster->

"Alberta Health strongly recommends **a second booster dose** for those who are **at the highest risk of severe outcomes** from a COVID-19 infection"

**There are currently up to 4,198,529 people who are currently ineligible to receive a transplant organ in Alberta due to the modified AHS requirements, upheld by the Alberta Court of Appeal and accepted by Health Minister Jason Copping.**

Population of Alberta 4,416,692 (down 3,347 since the peak in January. How?)

779,674 have had ZERO doses.

188,976 have had only 1 dose (-6,395 in the last 6 months).

1,617,764 have had only 2 doses (-3,108 in the last 6 months).

682,645 have had only 3 doses (27,136 in the last 6 months).

1,147,633 Albertans have had 4 doses (218,163 in the last 6 months).

3,637,018 Albertans have had 1 or more doses (235,796 in the last 6 months).

**There are currently 779,674 people in Alberta that have had zero doses of the COVID vaccine, leaving at least 3,448,042 people who THINK they are vaccinated and eligible for a transplant, but are not currently vaccinated enough. Currently eligible vaccinated Albertans (by vaccination status) could be as low as 218,163 out of a population of 4,416,692. Be careful what you wish for. You just might be signing your own death certificate.**

Back to the UK. The reality is that this is the same for every country, but the suppression of reporting AEFI masks that information, including here in Alberta.

For a breakdown of how hard it is to report an AEFI in Alberta, see this video I produced last year.

<https://rumble.com/v1q2jyq-how-hard-is-it-to-report-an-adverse-event-in-alberta.html>

This is an extract from the longer podcast more than a year ago.

<https://dksdata.com/podcasts#E3>

More Alberta COVID Data proving the lies being deleted by the government and AHS:

<https://twitter.com/dksdata/status/1670805763202195460?s=20>

<http://dksdata.com/AlbertaDead>

## THE LIES THAT BIND

In Alberta, on March 12<sup>th</sup>, 2020 (without any legislative authority), the Alberta Government Cabinet and Chief Medical Officer of Health (CMOH) Dr. Deena Hinshaw ordered almost all gatherings of **250** people or over **CANCELLED**

(<https://www.youtube.com/watch?v=CmKWIRUmXUQ>)  
(<https://www.alberta.ca/release.cfm?xID=6980324A5B1B0-BC2C-40A8-A6AD9E30E3189425>)

This effectively closed many businesses and leisure facilities overnight. Some never recovered from this.

**JUST TWO WEEKS.** – What happened in those two weeks?

A total of 486 'Cases' of COVID were reported in Alberta in live updates each day (and through Mainstream and Social Media platforms).

After 2 weeks, the CMOH, current **Deputy CMOH Dr. Mark Joffe**, (now **Alberta's CMOH under Premier Danielle Smith**) and Media reported;

(<https://www.youtube.com/live/flGH1gYVhQ>)  
(<https://edmonton.ctvnews.ca/alberta-confirms-67-more-cases-of-covid-19-27-patients-have-recovered-1.4869491>)

"**March 26** – Alberta has **67 more cases** of COVID-19, but the province announced that **27** of the **486 total** patients have **recovered** from the virus."

Yet, the data from Alberta Health shows **ONE ACTIVE CASE!!!**  
(485 recovered cases by March 26<sup>th</sup>, 2020).

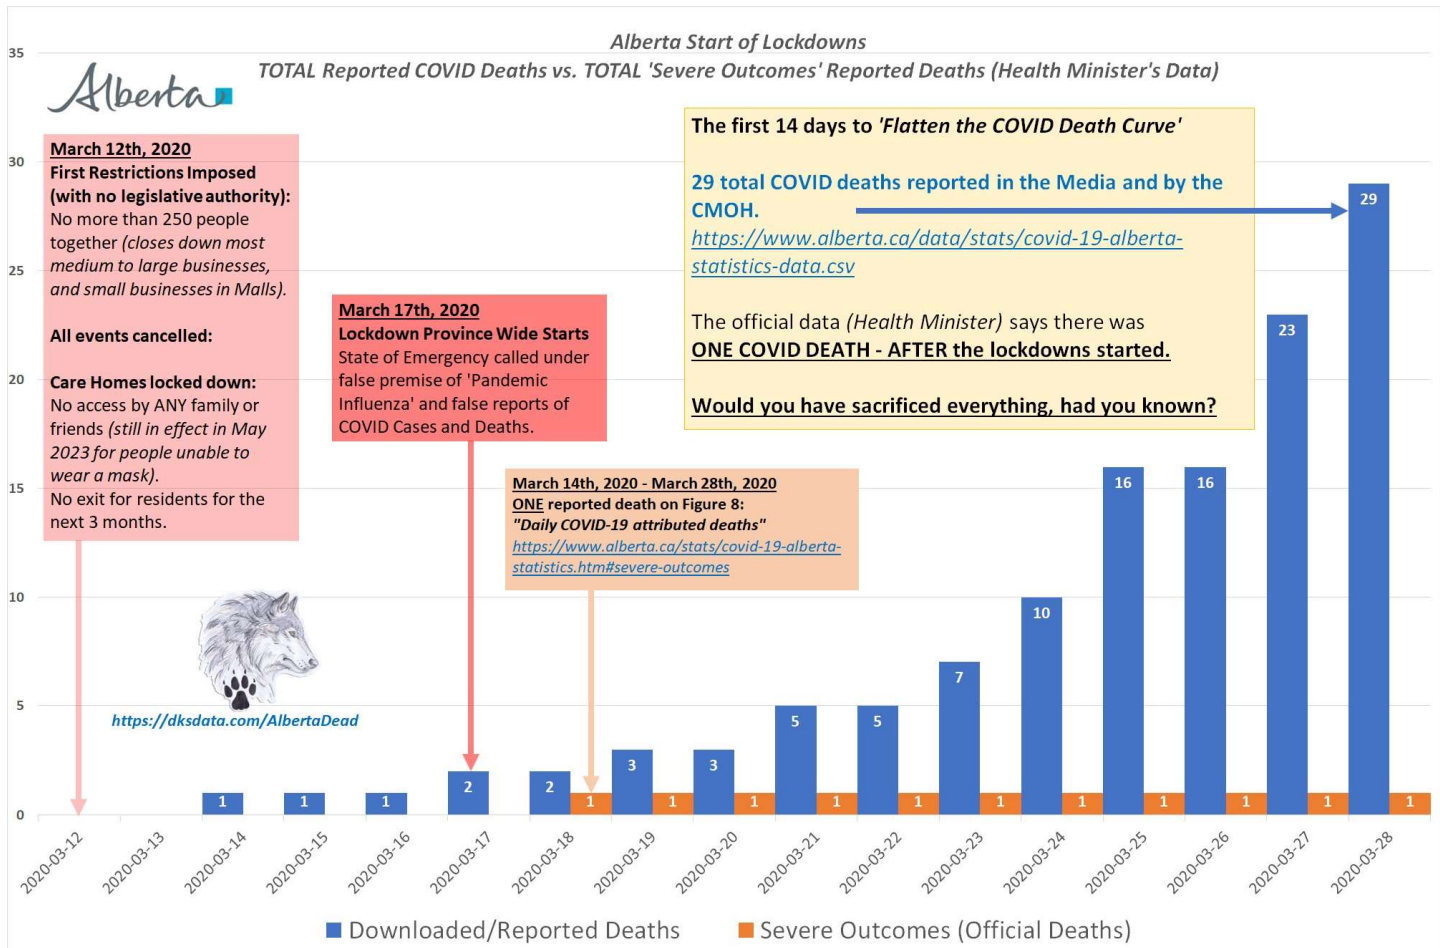

**Would you have given up everything had you known?**

(<https://www.alberta.ca/data/stats/covid-19-alberta-statistics-data.csv>)

**As reported in the Mainstream Media and Live Government Updates:**

(<https://www.ctvnews.ca/health/coronavirus/tracking-every-case-of-covid-19-in-canada-1.4852102>)

And what about Cases? Lies from the media and the government from the very start. This includes our current and previous CMOH at the time (Mark Joffe and Deena Hinshaw).

Date	Report
2020-03-05	<b>March 5</b> – A woman in her 50s from the Calgary area who recently travelled aboard the Grand Princess cruise ship in California was identified as Alberta's first presumptive case of COVID-19. This case was confirmed on March 6, and the patient is self-isolating.
2020-03-06	<b>March 6</b> – A man in his 40s in the Edmonton region was announced as the province's second presumptive case after he tested positive upon returning from visiting the United States. He had visited Illinois, Michigan and Ohio before returning home on Feb. 28. The source of his infection is a companion who travelled with him in the U.S. who had previously been a passenger on the Grand Princess cruise ship. This travel companion is one of the confirmed cases in B.C.
2020-03-08	<b>March 8</b> – Health officials said a man in his 60s from the Edmonton region was the third presumptive case. He had been on the Grand Princess cruise before he returned to Alberta on Feb. 21. The fourth presumed case is a woman in her 30s from the Calgary region. She had been in close contact with someone who had recently travelled in Europe, including visits to Ukraine, Turkey and the Netherlands. This person is also a resident of Alberta, and is currently undergoing tests. Both presumptive cases are recovering in isolation at home.
2020-03-09	<b>March 9</b> – Alberta health officials announced three additional cases, bringing the province's total to seven. One case involves an Edmonton-area woman in her 70s who had come in contact with the case announced on March 8 who had contracted the virus while on the Grande Princess cruise. The sixth case is a Calgary-area man in his 30s who had travelled in Ukraine, the Netherlands and Turkey who had also been in close contact with the fourth case identified on March 8. The last case is a Calgary-area woman in her 50s who was on the MS Braemar cruise ship from Feb. 11 to March 4. All Alberta cases are now confirmed and the province no longer requires additional confirmation from the National Microbiology Laboratory.
2020-03-10	<b>March 10</b> – Seven more cases were confirmed by health officials, doubling the number of cases in Alberta. All patients likely caught the virus while travelling. Destinations included France, the Netherlands, Egypt, Iran, Taiwan, Germany, Malaysia, Trinidad and Tobago, Panama, the Philippines and the United States. Several travellers visited more than one country. One individual was also on the MS Braemar cruise. One of the patients had a pre-existing health condition and was transported to hospital. Three are from the Edmonton area, a male in his 70s and a female in her 60s who had travelled together, and a female in her 30s. Four cases are from the Calgary area, involving a man in his 50s, two females in their 30s, and a female in her forties.
2020-03-11	<b>March 11</b> – Five new cases of COVID-19 were identified in Alberta. All of those cases were linked to travel. One case involved an Edmonton man in his 30s who recently came back from international travel and also visited Misericordia Hospital for an unrelated, previously scheduled treatment prior to being tested and diagnosed. Alberta Public Health was contacting anyone who was in direct contact with him. Alberta's chief medical officer of health said there is no risk to patients at the hospital "at this time." The other four cases are a man in his 20s and three women in their 30s, three of whom are from Calgary and one from the central zone. All five patients recently travelled abroad to countries including Iran, Egypt, Spain, Washington state and Mexico.
2020-03-12	<b>March 12</b> – Four new cases, all in the Calgary-area, were announced, bringing the provincial total to 23. The cases involved a two-year old child, a man in his 50s, a woman in her 30s and a woman in her 70s. The four recently returned from travel to Jordan, Egypt, France, Germany, and Florida.
2020-03-13	<b>March 13</b> – Six new cases were confirmed, all involving travel. One was a man from Edmonton who attended a conference in Vancouver where a positive case was identified. The remaining cases were from the Calgary area. One recently returned from Florida, while the others were household contacts of a previously confirmed case.
2020-03-14	<b>March 14</b> – Ten new cases were confirmed in Alberta, including two in which patients were admitted to intensive care. Six of the new cases were in the Calgary Zone, the other four were in the Edmonton Zone. Eight of the cases were connected to international travel. The province was investigating the other two cases. Both patients admitted to intensive care were in their 60s.
2020-03-15	<b>March 15</b> – Alberta health officials announced 17 new cases, bringing the total to 56. Two of the new cases were believed to be 'community cases' with no connection to international travel.
2020-03-16	<b>March 16</b> – There were 18 new cases – the highest single-day tally for the province so far.
2020-03-17	<b>March 17</b> – Health officials in Alberta announced 23 new cases.
2020-03-18	<b>March 18</b> – Alberta health officials announced another 22 cases of COVID-19, for a total of 119 cases. Seven of the cases were suspected to be community transmission and three were in Intensive Care Units.
2020-03-19	<b>March 19</b> – The province had its first death from COVID-19 – a man in his 60s with an underlying health condition – and 27 new cases.
2020-03-20	<b>March 20</b> – Alberta confirmed 49 new cases, bringing the province's total to 195. As many as 11 of the total cases, all in the Edmonton and Calgary areas, may be community transmitted. Ten patients are in the hospital, half of whom are in intensive care.
2020-03-21	<b>March 21</b> – Health officials announced 31 new cases of COVID-19 in Alberta, bringing the provincial total to 226. The province believed as many as 16 of the cases were due to community spread. Eleven people were in hospital, six of which were in the intensive care unit. The province also identified that one of the cases originated in a seniors' home.
2020-03-22	<b>March 22</b> – An additional 33 cases were reported in Alberta. There were 18 people hospitalized, seven of whom were in intensive care.
2020-03-23	<b>March 23</b> – The province confirmed 42 new cases, with up to 11 suspected to be from community transmissions.
2020-03-24	<b>March 24</b> – There are 57 new cases of COVID-19 in the province as well as the province's second death due to the disease. The victim is a woman in her 80s in the Calgary zone.
2020-03-25	<b>March 25</b> – Premier Jason Kenney announced 61 new cases of COVID-19 Wednesday, the largest day-over-day increase yet.
2020-03-26	<b>March 26</b> – Alberta has 67 more cases of COVID-19, but the province announced that 27 of the 486 total patients have recovered from the virus.

# COVID-19 Alberta statistics

Interactive aggregate data on COVID-19 cases in Alberta

Table of contents

COVID-19 Alberta statistics

Interactive aggregate data on COVID-19 cases in Alberta

Data reporting for the weeks of May 16-22, and May 23-29 2023, is delayed because of systems issues. We are working to resume reporting as soon as possible.

COVID-19 data included in the interactive data application are up-to-date as of end of day May 15, 2023, unless stated otherwise.

[View Alberta seasonal influenza statistics](#)

# REMEMBER 2020 40 Million Masks REMEMBER THESE DATES!

**March 17<sup>th</sup>, 2020**

Alberta locks down fully (without authority or cause)

**April 6<sup>th</sup>, 2020**

Kenney Promises Millions of Masks for Albertans

**Did he even ask?**

<https://twitter.com/dksdata/status/1670471483137855488?s=20>

IT IS NOT OVER. STOP BEING DISTRACTED.  
THIS ONLY ENDS WHEN THE TRUTH IS EXPOSED AND  
THE CRIMINAL INVESTIGATIONS START.

This was sent to all Healthcare workers at AHS after the  
announcement of masks being dropped.

**“KEY POINTS:**

- *Healthcare providers are asked to wear a mask if a patient asks them to do so. Updated signage will be available soon to be used in staff and patient care areas.*
- *Workers should continue to use routine practices and additional precautions as required by the IPC Risk Assessment to make personal protective equipment (PPE) decisions.*
- *Continuous masking will be required when:*
  - *Directed by an outbreak protocol,*
  - *Identified by the Attending Work with COVID-19 Symptoms or a Positive COVID-19 Test algorithms,*
  - *The IPC Risk Assessment indicates it as a control.*
- *Workers and patients/families may continue to wear a mask in all areas if they choose.”*

So, people like me still have to worry when calling an ambulance, going to hospital or even heading to the Care Home in case the masks are back prompted by just two symptomatic positive cases. These ‘cases’ could actually be the paramedics in the ambulance I call!

# Frequently Asked Questions

## 6. A patient has requested that I mask, however I do not want to mask at work anymore. What do I do?

- Healthcare providers are asked to mask when requested by patients to do so.
- We encourage workers to discuss masking, hand hygiene or other factors patient feel are important to their care.
- Vulnerable patients such as immunosuppressed individuals will receive identification to display to their care providers so care providers know to mask.
- Signage will be available for posting in staff and patient areas.
- Any concerns should be addressed with the care team and manager as appropriate.
- As more information becomes available, we will continue to update this section.

## 7. Do I need to mask if I am returning to work after a five-day work restriction due to testing positive for COVID-19 or having COVID-19 symptoms?

- Please refer to the [Attending Work with COVID-19 Symptoms or a Positive COVID-19 Test](#) and the corresponding [FAQ](#) for further guidance.

And again. The lies about the Deena Hinshaw memo now lead to Dr. Esther Tailfeathers (and others) resigning. How much did all this cost the Alberta taxpayer for another government cover up? How much more money did Deena walk away with?

WHY IS NO ONE ASKING QUESTIONS ON ANY SIDE?

I am.

The JCCF and other lawyers have failed those they claimed to represent. By design. Why would they want any of this to end when it has been such a cash cow for them? They buried evidence in 2021 and 2022 about the vaccines and what AHS knew and did.

Sheila's story feels like the Jerry Dunham tragedy all over again.

I opened a letter and saw this:

Are they representing you?

No, they're not actually...

No representation at the moment

Jccf tried to direct me to other lawyers a couple months ago. Then, those redirected as well.

I will be back on the Ledge Friday 23<sup>rd</sup> June, 2023 with Karen. You may think you are “immune” from all this but the repercussions of the last three years will impact us all.

Come and join us. Come and answer some questions.

Violet King Henry Plaza  
108th Street and 99 Avenue, Edmonton Alberta

*Friday June 23rd, 2023  
1 PM Mountain Time*
