Subject: Manipulation of Alberta Health Data requiring a full professional Police forensic investigation and the urgent return of data to the Alberta Health Public Dashboard

Importance: High

By Email Only.

Dear Madame Premier,

I have been analyzing the Alberta data (and other jurisdictions) for approximately three years now. This data tells a very concerning story, especially in how it has been used and abused. From isolation to testing, to masks and vaccine mandates. I have information on all the missteps taken. For now, I will limit this request to how the COVID 'case' and 'death' data has been willfully manipulated by your predecessors' government.

Has Alberta Health been constructing an alibi in real time? They clearly manipulated the data for what has been admitted to be political purposes. Below is just one clear example. I have many others.

Please check my work. The data is all available for anyone to see if they look hard enough.

In 2021/2022. Alberta Health/AHS moved almost 500 reported COVID deaths into 2020 in what can only be seen as an apparent attempt to falsify the perceived risk of death in one specific group.

How did they do this?

By reclassifying deaths from the year they died to the year they were put into the system with an initial COVID diagnosis. In some cases, the time from that diagnosis to a reported death was up to 768 days for someone in the over 80's category. Alberta has COVID deaths reported as high as 105 years and even 107 years old, so the 80+ category is quite large. See a breakdown of the data and source material here: <https://dksdata.com/AlbertaDead>

Now, pick any date in 2021/2022 after Alberta started to publish their "Vaccine Outcomes" page with deaths by vaccine status.

Anyone paying attention would have noticed a discrepancy in the 'Highlights' (total deaths) and the Deaths reported since January 1st, 2021. I did.

How about June 29th, 2021? On this date, Alberta Health/AHS stated; 2,301 total reported COVID deaths. 42.4% of the 12+ population and 36% of the total population were reported vaccinated. Significantly less than half population was fully vaccinated according to Alberta Health.

Alberta Health stated they were publishing the number of unvaccinated deaths since January 1st, 2021 vs the total number of deaths in that same time. That was a lie.

87.4% of deaths in the unvaccinated is enough to make anyone rush for protection. However, 53.4%, maybe not so much. This willful manipulation of data specifically prevented INFORMED CONSENT by anyone at the time. Now add to that the clearly illegal government lotteries (available to only those who agreed to be vaccinated, excluding a large portion of the Alberta Population), the coercion \$100 payments and finally the mandates. The intent was clear, despite the clear manipulation of data and lack of evidence to support the steps being taken.

Are there other examples of dates to support the above? Yes. In fact, two specific examples were filed into Court for review by the Alberta Justices in late 2021 to highlight the issue of a lack of Informed Consent. The dates used were relevant to the time of filing. October 25, 2021, and November 24, 2021. See Page 7 of:

https://dksdata.com/Court/DavidDicksonPackage/26-Exhibit-S_Filed_Redacted.pdf

Although this data was removed from public view in July 2022 (like it was from the UK ONS and other such systems at the same time), it is still collected and presented on the Alberta Health System Daily Dashboard.

1. **This is why there must be an immediate professional investigation (not a political review) into the clear and obvious misuse of this data.**
2. **In addition, the data that is readily available in the AHS system (that used to be available to Albertans) that is required for fully informed consent, must be restored immediately.**

There is no excuse for any further delays.

The Premier, Court of King's Bench of Alberta and Edmonton Police Service (among others) need to do their job.

More information for reference and further examples of concern can be found in my original court application. Unredacted copies can be made available on request.

<https://dksdata.com/CourtUpdate>

<https://dksdata.com/DavidDicksonCourt.html>

<https://dksdata.com/CrownCourt.html>

To anticipate a political response. Due to the information presented here, the clearly flawed 10 month review (with less than three months before an election) using \$2 million of tax payers' money by a retired Federal Politician is not the appropriate forum for this request for action.

Please note I will be unavailable on Tuesday January 31, 2023 as I attempt to take my severely disabled mother in law to an urgent medical appointment at the Royal Alexander Hospital (RAH). This will be a stressful day as I (along with many others) have been unlawfully refused service by AHS in recent months for our inability to wear a mask. This is despite written medical exemptions from our personal physicians. But that is a separate matter for another follow up with your office.

I look forward to your timely, considered and informed response to this matter.

David
