

ALL-CAUSE MORTALITY DATA – CANADA
Stats Canada Data as of April 10th, 2025

All provinces are lagging in reporting for 2023/24/25. Many are still modifying data as far back as 2010. AB, BC, N&L, NWT & QB have reported up to Week 5 for 2025. MN reported to Week 3 for 2025. PEI & SK reported to Week 2 for 2025.

January 9th, 2025 - April 10th, 2025 data

2024	250,125	183,420	297,780	312,325	-66,705	114,360	14,545	2024	241,300	183,450	293,505	304,010	-57,850	110,055	10,530	2024	235,850	262,365	283,510	306,110	26,515	21,145	22,600	2024	240,900	253,475	293,220	303,415	12,575	39,745	10,195
2025								2025								2025								2025							18,430

The two primary reporting tables ("By Cause" and "By Age") differ significantly. From January 2025 to April 2025 (3 months) Canada added 14 weeks of data yet All Cause mortality numbers have swung from a low of 183,420 to a high of 312,325 just for 2024. Even 2010 saw from minus 625 to plus 550 deaths (by cause) and changed the cause of death in up to 33,070 people.

In 2020, Canada was shut down due to daily 'CONFIRMED' COVID deaths. Yet, in 2025 Canada is still unable to provide semi accurate death data from month to month going back 15 YEARS. Since January 2025, Canada removed up to 30% of the reported deaths then increased the total by almost 60% just for 2024. This is NOT the same reclassification issue as "UNKNOWN CAUSE".

Deaths, especially in the younger population, are increasing. In 2024 deaths over 65 have started to increase again also. These are not deaths being driven by immigration or the “baby boomers”. **ALL 2024 provincial data show this will only get worse from here. 2024 WILL be the worst on record for All-Cause deaths in Canada & we have still not seen a reset for premature excess deaths since 2019. Whatever is causing these excess deaths is still happening (and it isn't COVID).**

By Age reported deaths are already at 312,325 for 2020 in Canada. Over the next year that number will climb as the Provinces continue to update their records. As usual Ontario is significantly behind with its All-Cause mortality data. Based on recent history since 2020, Canada would normally add another 70,000 deaths to the prior year (2024).

The two primary reporting tables ("By Cause" and "By Age") differ significantly. From January 2025 to April 2025 (3 months) Canada added 14 weeks of data yet All Cause mortality numbers have swung from a low of 183,420 to a high of 312,325 just for 2024. Even 2010 saw from minus 625 to plus 550 deaths (by cause) and changed the cause of death in up to 33,070 people.

ALL-CAUSE MORTALITY DATA – CANADA

Stats Canada Data as of April 10th, 2025

Why do we no longer see data on 'By Vaccine Status' or 'Co-Morbidities'?

<https://dksdata.com/Articles/COVArticles/ReportTables.pdf>

All provinces are lagging in reporting for 2023/24/25. Many are still modifying data as far back as 2010. AB, BC, N&L, NWT & QB have reported up to Week 5 for 2025. MN reported to Week 3 for 2025. PEI & SK reported to Week 2 for 2025. Ontario is reporting up to Week 45 for 2024. However, the data shows a lagging in even the reported numbers which will increase over the coming months. As a result Canada appears to be seeing a drop in Excess Deaths towards the end of 2024 that is not a reflection of the true number of overall deaths that continue to climb.

Data up to April 10th, 2025

ALL-CAUSE MORTALITY DATA - ALBERTA

Stats Canada Data as of April 10th, 2025

Why do we no longer see data on 'By Vaccine Status' or 'Co-Morbidities'?

<https://www150.statcan.gc.ca/n1/daily-quotdien/221208/dq221208f-cansim-eng.htm>

Alberta reporting for All Cause mortality continues to be manipulated. The first 5 weeks of 2022 & 2023 totaled the same - 3,385. This alone is a statistical impossibility with weekly deaths not matching year on year. Add to that the first 5 weeks of 2024 & 2025 totaled the same - 3,365 and we have a clear manipulation of All-Cause data.

All Cause Deaths - Alberta				
Week	2022	2023	2024	2025
1	640	755	645	655
2	645	695	695	710
3	695	650	680	645
4	675	635	690	705
5	730	650	655	650
Total	3,385	3,385	3,365	3,365

Health Canada reports 568 less COVID involved deaths in 2020 than Alberta Health. Overall Health Canada and Alberta Health data differs in COVID involved death reports up to April 10th, 2025 by 1,186 with Alberta Health reporting 6,946 and Health Canada reporting 5,760. Remember, Alberta Health is the only source of data in Canada for COVID reported deaths - Health Canada receives all its death data from the Provinces.

THIS IS NOT COVID

THIS IS NOT AN AGING POPULATION

THIS IS NOT IMMIGRATION

SO WHAT IS KILLING ALBERTANS SINCE 2020?

WHY IS NO ONE TALKING ABOUT THIS?

In 2022 in Ontario there were 20,875 more deaths than 2019, and 13,365 more deaths than 2020 (the 'pandemic' year)
Note that 2022, 2023 & 2024 data are still being modified.
