

ALL-CAUSE MORTALITY DATA – CANADA

Stats Canada Data as of January 9th, 2025

All provinces are lagging in reporting for 2023/24 and many are still modifying data for 2021/22. The final All-Cause death numbers for all provinces are expected to be above the high of 2022. Data from Jan 8th 2024 to Jan 9th 2024 saw an increase in Canadian reported All-Cause deaths of;

- +50 in 2021 (minus 25 since December 2024)
- +17,000 in 2022 (minus 20 since December 2024)
- +113,875 in 2023 (minus 110 since December 2024)

Federal and Provincial totals for 2021/2023 differ by 21,575 in the same data set. Federal “By Age” and Federal “By Cause” totals differ by 14,275 reported deaths. Alberta, BC, & NWT have reported up to Week 44 for 2024. Quebec posted partial data for Week 43. However, even these numbers are not yet confirmed and will rise in the coming months.

Most provinces, & Canada overall, show a disturbing increase in deaths, especially in the younger population. In 2024, deaths in older age groups are increasing due to ongoing Care Home Lockdowns. These are not deaths being driven by immigration or the “baby boomers”.

ALL 2024 provincial data shows this will only get worse from here.

2024 WILL be the worst on record for All-Cause deaths in Canada & we have not seen a reset for premature excess deaths since 2019 totalling 308,549 (24,234 more than 2019 deaths & 3,019 more than 2020 deaths). Whatever is causing these excess deaths is still happening (and it isn’t COVID).

THIS IS NOT COVID
THIS IS NOT AN AGING POPULATION
THIS IS NOT IMMIGRATION

SO WHAT IS KILLING BRITISH COLUMBIAN'S SINCE 2020?

WHY IS NO ONE TALKING ABOUT THIS?

By week 52 in British Columbia there have already been 7,440 more deaths than the whole of 2019!
Note that 2022, 2023 & 2024 data are still being modified.
