

ALL CAUSE MORTALITY DATA – CANADA

Stats Canada Data as of April 18th, 2024

All provinces are still lagging in reporting for 2023 and many are still adding data to 2022. The final all cause death numbers for all provinces is expected be above the high of 2022 as a result.

Only Alberta, BC, Newfoundland & Labrador, and Quebec have reported up to Week 5 for 2024, but even these numbers are not yet confirmed and will likely rise in the coming months.

Alberta is showing a disturbing increase in deaths in the under 45 age groups for 2023. These are not deaths being driven by immigration or the “baby boomers”. Alberta is a stark example of this younger age groups dying at an accelerated rate.

Nova Scotia deleted 25 weeks of data from 2023 (not only reporting to Week 5). This removed over 4,000 deaths from the data.

2024 provincial data is showing this will only get worse from here.

WHERE DID ALL THE DATA GO FOR NOVA SCOTIA?

In April they have All Cause Data to Week 5 of 2023. In March they had published data to Week 30 of 2023. Between March and April publications, Nova Scotia deleted 4,115 All Cause deaths and 25 weeks of data. Note this data is also removed from the Canada total, skewing the overall data.

Data up to 1pm ET March 14th, 2024
