

# ALL CAUSE MORTALITY DATA – CANADA

## Stats Canada Data as of August 8<sup>th</sup>, 2024

All provinces are still lagging in reporting for 2023/2024 and many are still adding data to 2022. The final All Cause death numbers for all provinces is expected be above the high of 2022 as a result. January 8<sup>th</sup>, 2024, to August 8<sup>th</sup>, 2024, data saw an increase in Canadian reported all-cause deaths of;

- -65 in 2021
- +16,990 in 2022
- +110,020 in 2023

Only Alberta, BC, and Quebec have reported up to Week 22 for 2024. However, even these numbers are not yet confirmed and will likely rise in the coming months.

Most provinces (and Canada overall) are showing a disturbing increase in deaths in the under-45 age groups for 2023/2024 that continues to rise.

These are not deaths being driven by immigration or the “baby boomers”.

*Nova Scotia deleted most of the data from 2023 in April & again in June. What was added back has at least 3k deaths missing from the data. Manitoba has reported to Week 34 of 2023. This excludes approximately 5.4k deaths (just for 2023). Canadian Federal level data has approximately 9k all-cause deaths still unreported for 2023 alone. In 2024, to Week 22, there are approximately 40k-50k deaths still unreported, which places 2024 on course to be the worst year for all-cause deaths in Canadian history.*

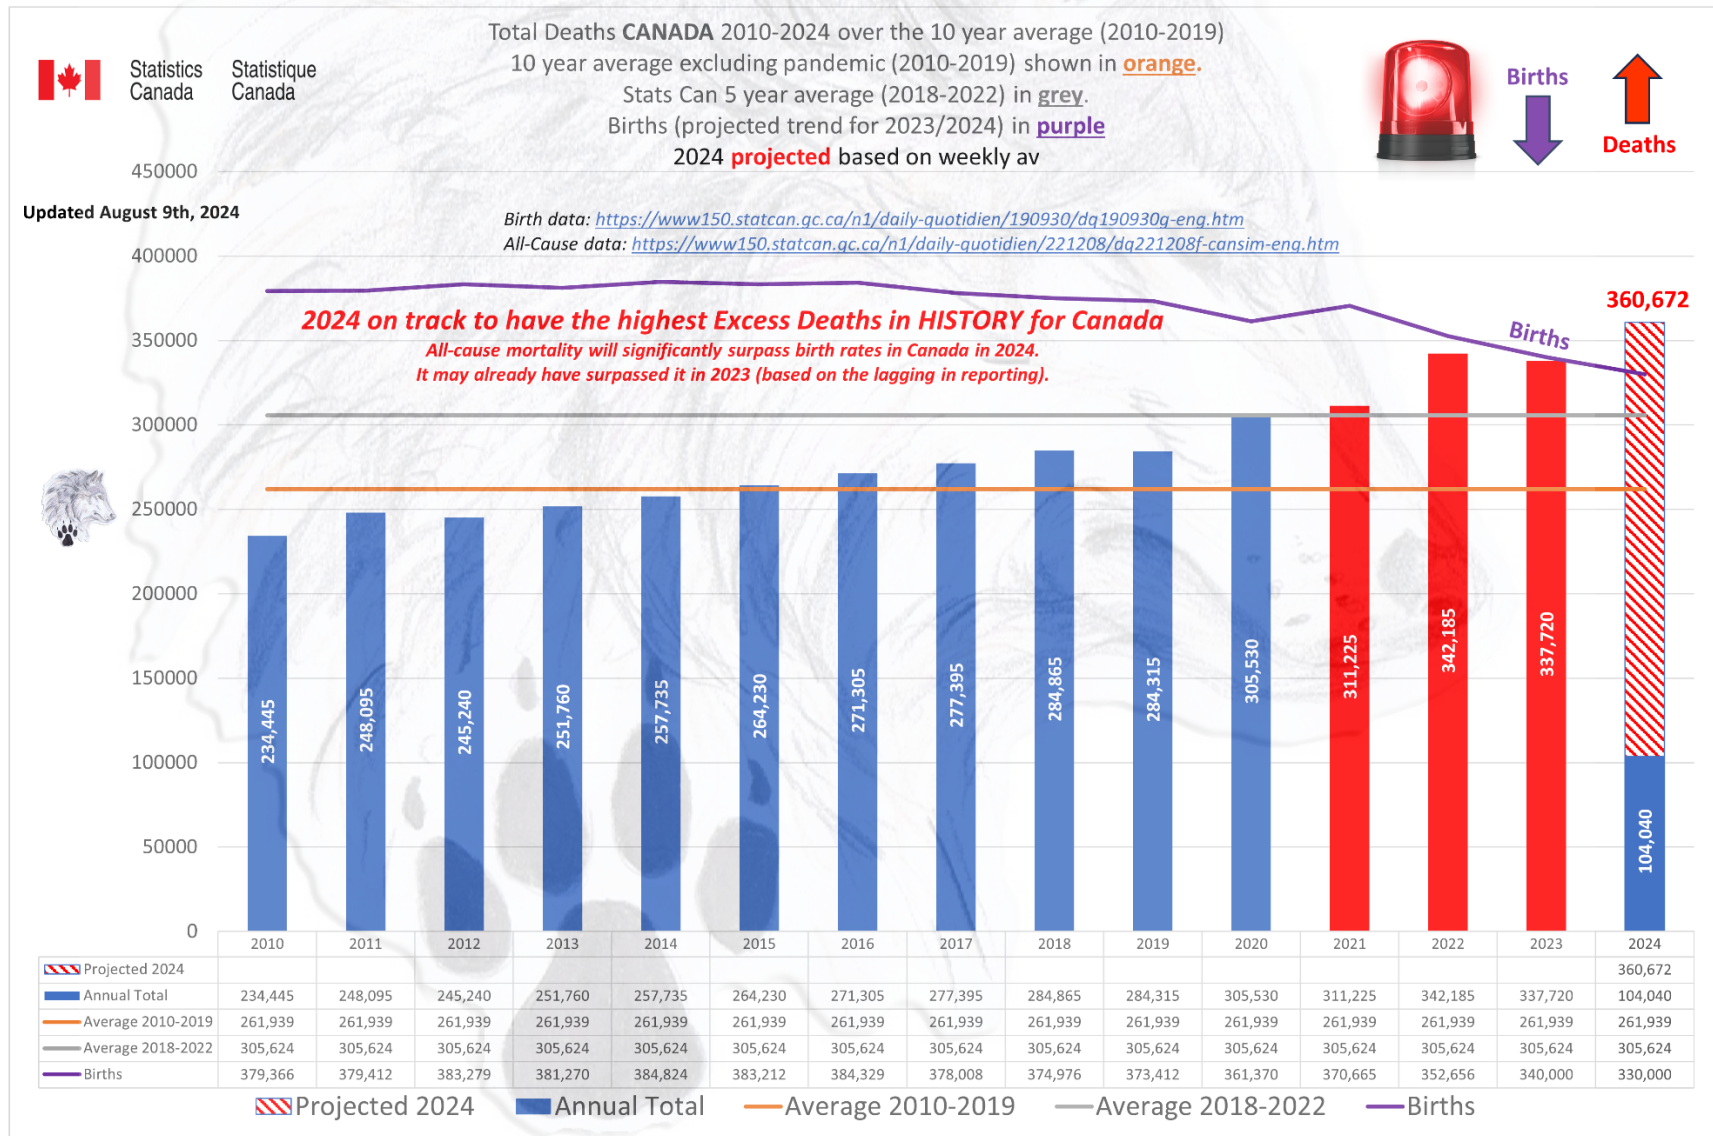

2024 provincial data is showing this will only get worse from here.

## WHERE DID ALL THE DATA GO FOR NOVA SCOTIA?

Nova Scotia deleted 25 weeks of data from 2023 in April. This removed over 4,900 deaths from the data. In May Nova Scotia reported to Week 38 with noticeable lagging in weekly reporting. This significantly impacts the Federal reporting as all data originates from the Provincial systems.
