

ALL CAUSE MORTALITY DATA - CANADA

Stats Canada Data as of February 8th, 2024

For almost 3 years, we were told how many people died of COVID daily.

By January 2024, Ontario had not reported a single cause of death for 2023. Canada had reported **112,015 Ill Defined and Unspecified or Information Unavailable (Unknown Cause)** making up over 50% of all reported deaths in Canada in 2023 at the time.

Suddenly, after drawing attention to this, the February 2024 Health Canada data has causes of deaths for Ontario. Unknown Cause still accounts for over 28% of all reported deaths in Canada (**71,860**) and over 35% of all reported deaths in Ontario (29,195).

Last month the world went mad when it was reported there were **16,043 Unknown Cause** deaths in Canada (not the true number at the time).

See my detailed report on that here:

<https://dksdata.com/COVArticles?9> (PDF copy here: <https://dksdata.com/Articles/COVArticles/Nov27report.pdf>)

Even with the sudden drop in the current reporting, where is the outrage for **14,710 Unknown Cause** deaths still for Canada in **2022** and **71,860 Unknown Cause** deaths in **2023**.

Excess Deaths are out of control and not a word from any Premier. WHY?
