

ALL CAUSE MORTALITY DATA – CANADA
Stats Canada Data as of March 14th, 2024

All provinces are still lagging in reporting for 2023 and many are still adding data to 2022. The final all cause death numbers for all provinces is expected be above the high of 2022 as a result.

Only Alberta, BC, Newfoundland & Labrador, and Quebec have reported up to Week 52 for 2023, but even these numbers are not yet confirmed and will likely rise in the coming months.

Alberta is showing a disturbing increase in deaths in the under 45 age groups for 2023. These are not deaths being driven by immigration or the “baby boomers”. Alberta is a stark example of this younger age groups dying at an accelerated rate.

2024 provincial data is showing this will only get worse from here.
