

ALL CAUSE MORTALITY DATA – CANADA

Stats Canada Data as of September 12th, 2024

All provinces are still lagging in reporting for 2023/24 and many are still modifying data for 2021/22. The final All Cause death numbers for all provinces are expected to be above the high of 2022. January 8th, 2024 to September 12th, 2024 data saw an increase in Canadian reported All-Cause deaths of;

- -50 in 2021
- +17,000 in 2022
- +113,875 in 2023

Only Alberta, BC, Quebec & NWT have reported up to Week 27 for 2024. However, even these numbers are not yet confirmed and will likely rise in the coming months.

Most provinces (and Canada overall) are showing a disturbing increase in deaths, especially in the younger population.

These are not deaths being driven by immigration or the “baby boomers”.

Manitoba finally published data for 2024 although it is still modifying data going back to 2021.

ALL 2024 provincial data shows this will only get worse from here.

2024 WILL be the worst on record for All Cause deaths in Canada and we still have not seen any reset for premature excess deaths since 2020.

Whatever is causing these excess deaths is still happening (and it isn't COVID).

THIS IS NOT COVID
THIS IS NOT AN AGING POPULATION
THIS IS NOT IMMIGRATION

SO WHAT IS KILLING ALBERTANS SINCE 2020?

WHY IS NO ONE TALKING ABOUT THIS?

In 2022 in Ontario there were 20,935 more deaths than 2019, and 13,445 more deaths than 2020 (the 'pandemic' year)
Note that 2022 and 2023 data are still being modified.
