

FBI Director Christopher Wray Blames Sovereign Citizens, Militias for Summer's BLM/ANTIFA Riots

March 3, 2021

(bigleaguepolitics)FBI Director Christopher Wray blamed sovereign citizen movements and militias for the summer's unprecedented and historical riots, in which almost 30 Americans were killed, 700 law enforcement officers were injured, and 14,000 people were arrested.

Wray was responding to a question in a Tuesday hearing posed by Senator Ted Cruz. Cruz was inquiring as to the FBI's plan to deter and prevent mob-style riot crime in American cities, with Wray's answers seeming to suggest the agency has no real plan to avoid a repeat of the experiences of summer 2020 later this year.

In reality, the summer's riots are almost entirely the fault of Black Lives Matter and ANTIFA. BLM engaged in an onslaught of destruction targeting small businesses and powerless members of American communities, after the controversial death of George Floyd.

Wray made a token allusion to "anarchist" extremism, before citing sovereign citizens and militias for BLM/ANTIFA's violence.

WrayCruzBLMMilitia

"A lot of that activity fell in what we would categorize as anti-government, anti-authority violent extremism. Some of it is anarchist, violent extremism; some of it is militia violent extremism. Some of it might even be sovereign citizen violent extremism."

Wray made no reference to the criminal Black Lives Matter riot movement, or the street terror cult known as ANTIFA. He did reference a Patriot Prayer demonstrator who was shot and killed by an ANTIFA militant in Portland.

With Biden's ascension to the Presidential Throne, Democrats are chomping at the bit at the prospect of using powerful and unaccountable federal law enforcement agencies to gin up bogus accusations and surveillance of patriotic Donald Trump supporters and America First advocates. Don't expect the FBI to arrive on the scene if ANTIFA/BLM crime explodes in the summer- unless, of course, a so-called "extremist" can be found on the scene waiving an American flag.
