<https://rumble.com/v2i4n8o-david-dickson-alberta-legislature-january-16th-2021.html>

I had spoken and written about this before 16th January 2021. But this was about the clearest I had got (without being completely de-platformed)

The Vaccine turned everyone who took it into a COVID generating machine - by design. From that point on all we have dealt with is Vaccine Associated COVID (a bit like Vaccine Associated Polio - THIS ISN'T new or controversial to say this. But it should have been terrifying.

COVID Vaccines - At best, brakes that slow you down but don't stop accidents... they create them.

"Okay. So, this is most of you know, me. Apparently. It's actually getting quite scary now, people coming up and saying, hi Dave. I'm Dave Dickson, the retired police officer from the UK. I'm also a cybersecurity consultant and a professional researcher. Normally I come up here and beat up on my colleagues. I did that midweek this week with Josh.

I want to say a few words about what you just heard about the story of what can happen when vaccines go wrong. And I mean vaccines are just about top of mind with everybody right now with COVID19 vaccines. I suppose the first thing we should do is actually correct the record. These things that the government has spent billions and billions and maybe even trillions of dollars on. Funding a big pharma to get these so-called vaccines ready. The first thing we need to understand is these don't fit the definition of a vaccine in any way whatsoever. A vaccine is something that's supposed to create an immunity. The manufacturers themselves, by their own definition, would make this at best a potential prophylactic treatment. Something to potentially help stop you getting bad symptoms. That is their best promise. So, you've heard about how vaccines themselves can actually do some harm, and how the worst thing you can possibly do, is be somebody who finds out afterwards.

Would you go buy a car that you know was promised to slow you down but not actually to stop you? Because that's what this, this vaccine is they're promising is it's the equivalent of a car that has brakes that slow you down, so the accident you get into won't be so bad, but it won't stop any accidents. Would you buy that car? I wouldn't. The funny thing is you'd all go out and research it, but for something that potentially will affect the rest of your life, most likely shorten the rest of your life and will certainly impact yours and those around you. Nobody's doing any research.

I mean, I know all you are. So, what does this vaccine do? Or these biological agents that they're injecting you in? They're not new, by the way. The mRNA vaccine is based on the technology that was used to treat cancer. And in order to do that it had to be targeted to a specific individual, genetically. It is by every definition a genetic modification and targeted genetic therapy. But we're just taking one random genetic therapy and injecting it to everyone. To turn everybody's body into an antigen creation engine. Basically, you're all going to anybody who gets this vaccine effectively has said I'd like to create COVID inside my own body so I can generate antibodies. Now that can't possibly go wrong, particularly with all the testing they did on a few thousand people. If it's not a vaccine, and it doesn't change your life. They've said that. The government said it will not stop you wearing a mask. It will not stop you having to social distance. It will not prevent you, it will not give you your life back. In fact, we're seeing in the UK, they've just rolled out vaccine passports. So, this alleged vaccine is no more than a tattoo to say what it is the government can do with you and to you it will not give you your life back. Everybody who thinks that they're going to suddenly at the end of this is getting their life back. This vaccine, or this biological agent they're going to introduce into you has done one thing and one thing alone. It is guaranteed. It will not change what the government is doing. All it's doing is spending money. It's never going to get you out.

I've just got my 5 minute one. I could be there for hours.

So, I said a few weeks ago, anybody who's wants to take this vaccine and thinks that it's going to change their life, just ask yourself how much research have you done. Firstly, have you got an understanding as to what it does to you, what the risks are. Already everywhere, every single country has stated that this has shown some highly unusual and much

greater major impacts in anaphylactic responses, including death. So, we already know it is the most risky vaccine. It doesn't vaccinate you. It doesn't prevent you getting it. It turns you into, at best, the most terrifying person on the planet, the asymptomatic carrier. Which is the whole reason why you get to wear masks and socially distance all your life. So literally everything the government is telling you is don't take this vaccine. So, the government is giving you every reason not to take it. Why in the hell are you queuing up for it? Go out and do some research. They're not trying to hide anything.

Just like, you know, Kenny isn't trying to hide the fact that the PCR test is false. They're not trying to hide the fact that the majority of people who've died are being 80 plus with significant multiple comorbidities. Nobody's dying of COVID19. So, all of this information is out there in plain sight. So, maybe maybe actually some of our politicians could come down here and explain it to us. I mean, Janis Irwin, David Shepherd, you seem to have a lot to say on this matter. Maybe you could come give the Black Lives Matter illegal protests when there was the same restrictions on and you decided that you could go to all these protests and it wasn't a problem. But now when somebody else wants to protest, it's a problem. But I suppose we're protesting against you getting a pension. So that's a problem, isn't it? And Janis Irwin we're not blocking any bridges here. But you seem to think blocking bridges and committing offences under the Road Traffic Act is not an issue. But us all standing here and having a friendly sort of chat about our rights and freedoms, that's obscene to you. You know what Janis Irwin, you were asked to come down here and maybe inform us of what you saw. The lies that you told as an elected official. Kenny, why aren't you speaking out about these politicians lying? Are you just waiting for them to go on holiday before you start speaking out?

It's great to see everybody here again today. This is where I recharge my batteries, seeing actual faces, things that people in care homes don't get to see and haven't seen for a for a very long time. So, the offer to Jason Kenney, Shandro, Deena Henshaw, the mask expert who's in charge of the vaccines, who puts it over his glasses. Now that extends to Janis Irwin and David Shepherd. We will find you a care home to go and spend 2 weeks in. Preferably one that's on outbreak so you don't get to leave your room for two weeks. And then after two weeks you come up here and tell the people here that everything is fine, that everything is good, and that you're quite happy with what's happening to the people in the care homes, David Shepherd and Janis Irwin on August the 12th, [2020] I sent you all the information, including letters and emails from our zone medical officer where they said they were quite happy for these people to never be allowed to see anyone again. That is a direct violation of the provincial Health Act and our zone medical officer here in Edmonton wrote that down. Well, you've got that information, Janis Irwin, you've got that information, David Shepherd and Kenny and Hinshaw. The lot of you. You all got it, and not a single one of you bothered to respond. So how do you say you care about anyone? You don't care about anything other than your pension and your little bloody soapbox to talk about all the crap that you go on about without ever getting out here and doing something real? Come out here and actually face your constituents.

Okay, I'm going to wrap up now because I don't like Josh is going to drag me off with a big hooked stick.

Keep coming. Keep pushing your local businesses to open up and support them. If you're the churchgoer of any denomination, speak to whoever is in charge. Get them to come down here, get them to join together. We have a wonderful person here who's actually come down and spoken to him many times before he wants he's basically putting out a challenge and I'm going to put out the challenge. I'm not religious, but what I saw last year with churches rolling over and getting into bed with the governments was a disgrace. It's time for churches to create that separation of power and come together. It's time for the constituents to demand that their religious leaders do better and stand up for their rights. And stand up and do what we do here every week. If you don't push them, they won't do anything. So, it's up to you and everybody you know. To push back. So, when you leave here, if you go to church tomorrow, demand that your, your whoever is in charge of your church does better. Remembers the separation of church and state, and stands up for all of you. Because if they don't, then we're going to have to. So. And again, one last thing. Thank you again to the Sheriff's for everything they do. And thank you to EPS.

And the rest of you of my colleagues, especially you over there in the Alberta Justice Building. Get the disclosures ready because you're going to be asked for them. You're going to be busy. The rest of you, all the professionals, either do your job or go home and take the uniform off."
