Kyoto University creates mask from ostrich cells that glows when coronavirus is detected

[Alice Finney](#) · January 10, 2022 at 11:00 PM

Scientists from Kyoto University have developed a face mask made with ostrich antibodies that glows under ultraviolet light when coronavirus is present.

The team of researchers created the mask to help people quickly detect and prevent the spread of coronavirus at a low cost.

A removable filter placed in the mask glows when exposed to coronavirus after being sprayed with a chemical liquid and exposed to ultraviolet lights.

The efficiency of the filter's detection was confirmed in a clinical trial where test subjects wore the masks for eight hours.

Questions to ask.

Where did they get this alleged "dead" RNA coronavirus,? RNA viruses of this type are
neither alive nor dead. To handle an RNA virus, for this type of research, you would be
required to meet the biosafety standards of a level 3 lab.

WHO GAVE THEM THE 'DEAD' COVID VIRUS TO INJECT IN THE BIRDS?

WHO APPROVED THE EXPERIMENTAL INJECTIONS (and what licences do they have to run an open air level 3 biolab in Canada?)

Did the Schwankes of Whitecroft Valley get ostriches that had been injected with COVID for use in the food chain?

What other viruses have they used on these birds, considering this has been their primary business to experiment with viruses on them since 2020 (according to court filings)?

Have they sold their birds or eggs to anyone other than the Schwankes since 2020? In 2020, they had 500 birds, and now they have fewer than 400. Where did the others go during their time of experimenting on them?

Edgewood ostrich farm showing resistance to avian flu
Kootenay farm ordered by CFIA to kill all 400 birds, despite groundbreaking research

Jan 9, 2025 5:08 AM

We have been in a battle to save our ostrich family for over a month now from CFIA killing all of them. Ducks flew onto our farm on their migratory path to Mexico and brought a H5N1 virus. This battle has gone on for 52 days now since we have been quarantined and 35 days no Avian deaths. We are over the contaminated stage of 2 to 14 days according to CFIA's site. Our birds have hit herd immunity 34 days ago and are happy and healthy. One complete side of our farm had no signs or symptoms of the virus so had immunity from the H5N1 virus. These birds were exposed to a pseudomeasles in 2022 where we lost about 10. Some of these birds were amongst the birds that got sick and still show no signs or symptoms to the virus. CFIA did a single PCR test on two dead birds and within 24 hours told us that we were under quarantine and then within 42 minutes of that call they signed a complete cull order to destroy our entire farm. We requested that they tested some of the live birds and they refused. They made no attempt to test any of the ducks that brought the H5N1 or collect a good sample, stating that the ducks are not their responsibility. All our birds are either recovered or have built an immunity to the virus. Why would we let off the strong immunized birds that are now very healthy and would not get this virus again? CFIA wants to kill them and pay us pennies on the dollar of what they are worth to repopulate with birds that do not have a resistance to the virus so next year we can go through this all over again. If we keep allowing this kind of CFIA behavior then we are truly headed for the next pandemic as viruses are allowed to mutate and grow. We need to take a stand and become a strong voice to change the policies that allow these kind of actions. Ostrich live up to 75 years of age and breed up to 55 years of age and many of ours have names and know their names. We are a research farm and working with Dr. Tsukamoto utilizing the amazing immune system of the ostrich hens. We take the natural antibodies out of the ostrich egg once it is laid and can mass produce these amazing natural antibodies to get into natural products helping people and animals. 1 ostrich egg is the same as 100 chicken eggs of antibodies. This science should never be overlooked or stamped out. This would be a complete tragedy. Please help us save our birds as the lawyer fees are much more expensive than we expected and the journey is much longer than anticipated. You can go to GoFundMe <https://gofundme.com/edgewoodostrich> or GiveSendGo <https://infolink.in/gKCrVdn>. Together we can be the voice to save our birds and the next farm that will go through this. This fight is not only for our birds but for all farms. Who will fall next?

This farm always treated these animals as disposable.
From slaughtering for meat & cosmetics to experimenting on them.
What do they have planned when they are 'saved'?
More experiments?
People are fighting for the lab to keep the 'puppies' that the pharma companies experiment on.

Experience

Co-Owner
Struthio BioScience Inc. · Permanent Full-time
Apr 2021 - Present · 4 yrs 2 mos
British Columbia, Canada · On-site

I am working with the leaders in the world exclusively creating Natural Antibodies utilizing the amazing immune system of the Ostrich. Our company is a leader in creating curative products! Watch us closely, it is going to be amazing!!

Owner (President)
Universal Ostrich Farms Inc. · Self-employed
May 2001 - Present · 24 yrs 1 mo
Edgewood, B.C.

I have been in the Ostrich Industry for 30 plus years now and work with incubating, hatching, raising of chicks, breeder care and product manufacturing and distribution. Consistently producing top quality products (meat, oil, hides, eggs and feathers) We are presently producing Neutralizing COVID 19 Antibodies. These amazing antibodies also cover any variants that come along. We are working hard to find the right company to put these antibodies into a nasal spray. Very Very proud of our work

Owner (President)
ONU Body Care Inc. · Self-employed
Jan 2012 - Present · 13 yrs 5 mos
Edgewood, B.C.

ONU Body Care Inc. has specially formulated skin care products high in omega 3-6-9 essential fatty acids to replenish and repair skin cell damage. Our products are great for Eczema, Burns, Age Spots, Anti-Aging, Sunburns, Scars, Stretch Marks, Dry Cracked Feet and all around skin cell replenishment. The University of British Columbia tested our oil to be 50 % higher in omegas than found in literature values and we are doctor endorsed. Our website is www.onubodycare.com. Check us out!

Vice President
Omega Ostrich Inc.
Jan 2011 - Feb 2024 · 13 yrs 2 mos
Edgewood, B.C. Canada

Omega Ostrich Inc. is responsible for buying yearling ostrich from producers, for process and distribution of all products. Omega Ostrich maintains quality control through its process to ensure the end consumer receives top quality products at all times. Currently Omega has a contract to sell all of its oil to ONU Body Care Inc. who also believes in "quality comes first!".
